PROFESSIONAL SUMMARY

Backend and Automation Engineer with production experience building serverless ETL pipelines on AWS and deploying AI workflows on n8n and PostgreSQL. Shipped 5+ production automation pipelines at BFM Media in under 12 months, saving 10+ hours per week of manual data entry. Certified in Java (OCA), Cloud Security (CCSD), and CompTIA Tech+. Seeking an AI Engineering role to develop scalable, secure LLM integrations and enterprise automation systems.

TECHNICAL SKILLS

• Programming Languages: Python, Java, SQL, JavaScript, C#
• AI & Automation: Anthropic Claude API, Prompt Engineering, n8n, Selenium, BeautifulSoup, Google Apps Script
• Backend & Frameworks: Spring Boot, RESTful APIs, Spring Security
• Cloud & DevOps: AWS (Lambda, S3, EventBridge, IAM, CloudSearch), Docker, AWS CLI
• Databases: PostgreSQL, MySQL, Supabase, MongoDB
• Developer Tools: Git, GitHub, Postman, VS Code, IntelliJ, Kiro

PROFESSIONAL EXPERIENCE

BFM MEDIA — Kuala Lumpur, Malaysia
Junior Backend Developer (June 2025 – Present)
• Designed an AI-powered CRM automation using n8n, Claude API, and PostgreSQL that processes business cards via WhatsApp in real time, eliminating approximately 10 hours per week of manual data entry.
• Built a serverless daily ETL pipeline using Python, AWS Lambda, EventBridge, and S3 to extract CMS data via REST APIs, replacing manual exports with a zero-maintenance automated solution.
• Architected an event-driven mobile activity feed ingestion pipeline using OneSignal Event Streams, AWS Lambda, and S3, delivering structured notification payloads to power the in-app inbox.
• Automated full back-catalogue podcast migration from AWS CloudSearch to Megaphone using a custom Python script that processed metadata, audio, and images, completing a multi-week project in days.
• Built a web scraper with Selenium and BeautifulSoup to extract Instagram engagement metrics, delivering the content team's first automated reporting dataset.
• Deployed a Google Apps Script onboarding system that converts Google Sheets data into structured JSON, custom PDFs, and templated emails, fully eliminating manual HR touchpoints.
TECH DOME PENANG — Georgetown, Penang
IT Educator Intern (October 2022 – March 2023)
• Developed and shipped an interactive Augmented Reality (AR) game exhibit using Unity and C# for science centre visitors.
• Facilitated foundational programming and logic workshops for over 100 students at Penang Digital Literacy Camp 2.0.

KEY PROJECTS

AI-Powered Incident Response & Runbook Assistant
Python, Claude API, PostgreSQL, FastAPI, Docker
• Developed an automated triage service that ingests incident alerts, extracts error signatures using Claude API, and queries past runbooks to output structured remediation recommendations.
• Implemented strict response schema validation using Pydantic to ensure deterministic JSON outputs for downstream automated ticketing systems.
Full-Stack E-Commerce Platform
Java, Spring Boot, Spring Security, MySQL, JWT
• Designed and implemented a complete shopping cart and checkout module with user authentication, role-based access control, and transactional integrity for order management.

CERTIFICATIONS

• CompTIA Tech+ (September 2025)
• Certified Cloud Security Developer (CCSD) (June 2024)
• Oracle Certified Associate (OCA) – Java Foundations (June 2024)

EDUCATION

Universiti Teknikal Malaysia Melaka (UTeM) (October 2018 – March 2023)
Bachelor in Information Technology (Game Technology) with Honours
• CGPA: 3.23 / 4.00 | Dean's List (3 semesters)

LANGUAGES

• Malay (Native), English (Proficient), Arabic (Elementary)
